

**Salvador's HOPE**  
**ANNUAL REPORT 2015-2016**

## **Our Vision-**

### **Hope is just the beginning...**

Salvador's HOPE has a vision to see people set free from the injustices of poverty. In El Salvador, Salvador's HOPE works with local communities to positively influence, impact and empower people through the establishment of programs that promote development and self- sustainability.

## **Children**

By working with local NGO's in El Salvador we fight for the rights and safety of children. Our work leads us to work with children who have been orphaned, abandoned, living in extreme poverty, victims of sexual and physical abuse, slavery, child prostitution and human trafficking.

Through our partnerships with orphanages, we are able to provide children with their basic needs; food, shelter, education, health care and clothing in a safe nurturing environment where they will experience safety, love and respect.

## **Women**

In El Salvador our work with women focuses on empowerment. For many years El Salvador has ranked as one of the most dangerous countries in the world. Much of the violence impacting the country is directed towards women. Tragically femicide and domestic violence plagues this beautiful lush Central American country.

Through our Women's Empowerment projects women are positively impacted through education, skills training and social support. Through local partnerships working at grass roots level, we aim to empower women to combat the issues and factors that perpetuate domestic and gender based violence.

Salvador's HOPE believes that we can change individuals lives, families and in turn communities by empowering women.

We believe that through our work we can bring about positive social change.

## **Director's Report-**

This past financial year we have seen continued growth of our projects in El Salvador and an increase in support of Salvador's HOPE in Australia. We are blessed to have people join and partner with our vision.

This year we have had three significant community organizations come into partnership with us as '**Visions Partners**'; Equip Ministries International, El Espanol-Spanish newspaper and La Familia Tu radio.

Through these partnerships and community support our new fundraising initiatives have yielded a good increase in funding as well as promotion of Salvador's HOPE's work in El Salvador and in Melbourne Australia.

The most significant increase we have seen the past twelve months has been in 'Projects support' in particular for our Children's feeding Program.

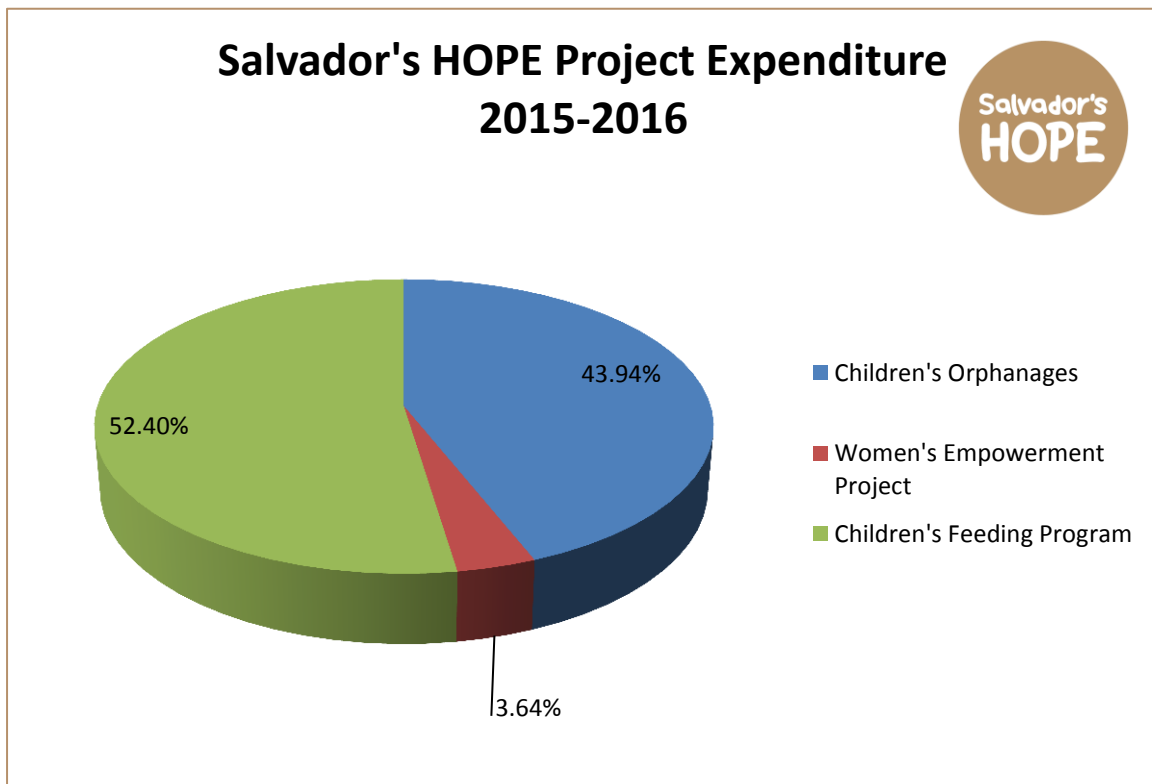

Our Projects continue to have positive influence;

-Providing for shelter and security for over 40 Children in the Children's home in La Paz.

-Providing nutritious meals for now over 130 Children in Lourdes.

-Strategic planning of the Women's empowerment project with 100 women attending the women's conference in November 2015.

You can see a more detailed report on our fundraising and expenditure here-
